PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of end-to-end experience building scalable, high-performance web applications using React.js, TypeScript, PHP (Laravel), and REST APIs. Proven track record of delivering measurable results: 40% reduction in report generation time, 30% improvement in backend performance, and 35% faster form submission across enterprise and client-facing platforms. Hands-on expertise in JWT/RBAC security, Redis caching, and containerization. Experienced in Agile/Scrum environments with strong cross-functional collaboration skills.

EDUCATION

Master of Computer Applications (MCA)

Manav Rachna International Institute of Research and Studies, Faridabad

2021 – 2023

Bachelor of Computer Applications –

DAV Institute of Management, Faridabad

2017 – 2020

SKILLS SUMMARY

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3, SQL

Frameworks: React.js, FastAPI, Laravel, Redux Toolkit, Node.js, Tailwind CSS, Material UI

Tools: GitHub, Jest, Webpack, Vite

Databases: MySQL, MongoDB (aggregation), Redis (caching, sessions)

Cloud & DevOps: AWS (EC2, S3, RDS), Azure, GCP

Security: JWT Authentication, OAuth 2.0, RBAC, Secure API Design, Password Hashing & Encryption

AI & Dev Tools: GitHub Copilot, Claude Code, Cursor

Soft Skills: Cross-functional collaboration, Code Reviews

WORK EXPERIENCE

Full Stack Developer | **Market99** Aug 2024 – Present

- Architected modular, enterprise-grade ERP dashboard using React.js (Hooks, Context API), TypeScript, PHP (Laravel), MySQL, and REST APIs — handling complex reporting workflows across large datasets
- Improved large-table rendering performance by 40% by implementing lazy loading and code splitting; built reusable UI component library using Material UI and Tailwind CSS following high-fidelity design specs
- Reduced SQL report generation time by 40% through query optimization (indexing, joins, stored procedures) and intelligent backend filtering
- Engineered secure REST APIs with JWT authentication and Role-Based Access Control (RBAC) protecting role-specific modules across the platform
- Leveraged Claude Code, and Cursor for AI-assisted development — accelerating feature velocity and improving code review quality
- Wrote unit tests using Jest; collaborated in Agile sprints with QA and product teams ensuring zero critical regressions post-release

Web Developer | Netcare Consulting Pvt. Ltd. Sept 2022 – Dec 2023

- Improved backend performance by 30% through code refactoring across full-stack applications built with React, PHP, MySQL, JavaScript, HTML5, and CSS3
- Implemented backend automation logic for dynamic forms, data validation, and multi-step workflows — reducing manual data entry errors by ~25%
- Enhanced page load speed and SEO scores by optimizing payload sizes, removing render-blocking scripts, and applying image compression — resulting in 20% improvement in Core Web Vitals
- Strengthened application security via input validation, secure data handling, and REST API best practices; zero security incidents reported during tenure
- Delivered modular, maintainable features across 6+ Agile sprints; maintained Git-based branching and release workflows

Web Developer | Finlux Technologies Sept 2021 – Sept 2022

- Improved operational efficiency and system usability by 20–25% by refactoring service-based web platforms (PHP, MySQL) and implementing frontend performance enhancements
- Developed secure form handling workflows with structured backend validation — reducing form errors and support tickets by ~30%
- Enhanced SEO and page performance through script optimization and structured markup; assisted in debugging, testing, and production issue resolution

PROJECTS

Internal ERP Dashboard | Market99

Present *React · TypeScript · PHP (Laravel) · MySQL · REST APIs · Material UI*

- Led end-to-end development of scalable ERP dashboard handling reporting, inventory, and operations management for 500+ internal users
- Achieved 40% faster report generation and 40% better table rendering via SQL optimization and React lazy loading; containerized with Docker for cloud-ready deployment

Creative Automation Dashboard

React · Node.js · REST APIs · Recharts

- Developed workflow dashboard to manage and automate digital asset processes with reusable React components and optimized rendering — reduced manual task time by ~40%

Loan Services & Visa Application Platforms

PHP · MySQL · Bootstrap · JavaScript

- Improved form submission performance by 35% and mobile usability by 25% via backend validation optimization and responsive UI redesign
